**Veillez répondre sur la feuille de sujet fournie.  
Veillez mentionner votre nom et prénom.**

▪ **Part 1 : Reading comprehension Text: (6pts)**

Data security refers to the protection of digital information from unauthorized access, use, disclosure, alteration, or destruction. In today's interconnected world, where vast amounts of data are generated and exchanged every second, ensuring the security of this information is paramount. Data security measures include encryption, access controls, authentication mechanisms, firewalls, antivirus software, and regular security audits. Organizations must implement robust data security protocols to safeguard sensitive information, such as personal data, financial records, intellectual property, and trade secrets. Failure to prioritize data security can lead to devastating consequences, including data breaches, identity theft, financial loss, reputational damage, and legal liabilities. Therefore, businesses, governments, and individuals must remain vigilant and proactive in addressing evolving threats to data security to preserve trust, privacy, and integrity in the digital age.

**Questions:**

**1. Why is data security important in today's digital world?**

.....  
.....  
.....

**2. What are some common threats to data security mentioned in the text, and how can they impact individuals and organisations?**

.....  
.....  
.....

- L'usage des téléphones portables et de tout objet connecté (montre intelligente, etc.) **est strictement interdit.**
- Aucun document **n'est autorisé.**
- Calculatrice **non autorisée.**

3. What are some key measures or strategies mentioned in the text for ensuring data security? 4. How do encryption, access controls, authentication mechanisms, firewalls, antivirus software, and security audits contribute to data security?

.....  
.....  
.....

5. Why is it important for organizations to prioritize data security, and what are some potential consequences of failing to do so?

.....  
.....  
.....

6 . How does the text convey the significance of trust, privacy, and integrity in relation to data security in the digital age?

.....  
.....  
.....

▪ **Part 2 : Language:**

▪ **Exercice 1 : Fill in the blanks with the appropriate modal verb ("need to," "have to," or "must"):** (5pts)

1. I \_\_\_\_\_ finish this report by tomorrow.
2. We \_\_\_\_\_ leave for the airport in an hour.

- L'usage des téléphones portables et de tout objet connecté (montre intelligente, etc.) **est strictement interdit.**
- Aucun document **n'est autorisé.**
- Calculatrice **non autorisée.**

▪ **Part 3 : Writing – Choose one of the two Options (5pts)**

**Option 1 :**

Look the following pictures. It shows one of the strategies a company could use to convert to a new computer system.

Example :

**1 Direct implementation:  
all-at-once change**

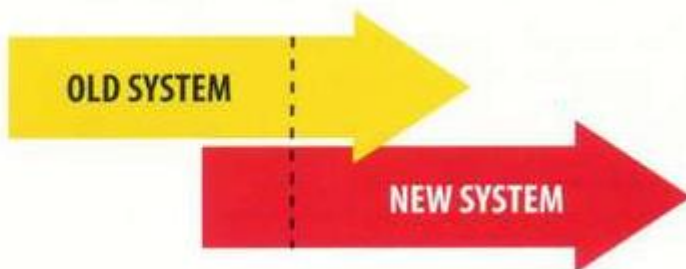

**1 Direct implementation:**

Direct implementation means that the user simply stops using the old system and starts using the new one. The advantage is that you do not have to run two systems at the same time. The disadvantage of this approach is that if the new system does not operate properly, there is nothing to fall back on.

As shown in the example, write a short paragraph describing it and mention one advantage and one disadvantage.

**2 Parallel implementation:  
run at the same time**

**Option 2 :**

Write a clear and concise paragraph describing the process of building a website.

.....

.....

.....

- L'usage des téléphones portables et de tout objet connecté (montre intelligente, etc.) **est strictement interdit.**
- Aucun document **n'est autorisé.**
- Calculatrice **non autorisée.**

This image shows a full page of white paper with horizontal dotted lines, typical of primary school writing paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
